TransAtlantic Retina Meeting

A Reunion of Innovators and Disruptors in Retina
Connecting R&D with Clinical Practice

The Vanguard Award

Research Honor

This award celebrates clinical investigator and scientist who successfully lead complex, multi-country clinical trials. It highlights the recipient's ability to drive global collaboration, navigate diverse regulatory environments, and maintain the highest standards of scientific rigor.

The Catalist Award

Translational honor

This award honors a researcher who challenges the status quo by introducing transformative ideas, pioneering methodologies, or novel clinical trial designs. It highlights the recipient's ability to destabilize old research bottlenecks, mobilize resources rapidly, and turn high-risk, high-reward scientific concepts into operational realities that benefit global health.

The Luminary Award

Lifetime Achievement in Research Honor

This award honors a visionary clinical investigator who has made enduring, foundational contributions to international clinical trials. It highlights the recipient's role as a trusted mentor, an influential authority in their field, and a beacon of scientific excellence whose work continuously elevates global medical standards.

The Visionary Award

Lifetime Achievement in Research

This award honors a forward-thinking clinical investigator who challenges standard medical paradigms by introducing revolutionary concepts and long-range strategic solutions. It highlights the recipient's exceptional foresight, courageous leadership, and unique ability to turn abstract, futuristic scientific ideas into practical clinical successes that reshape global healthcare.
