TransAtlantic Retina Meeting

A Reunion of Innovators and Disruptors in Retina
Connecting R&D with Clinical Practice

Topics

- Artificial intelligence and computational ophthalmology;
- Ultra-widefield and high-resolution imaging;
- Gene and cell therapies;
- Novel therapeutics and drug delivery systems;
- Surgical innovation and next-generation vitreoretinal devices;
- Clinical trial design;
- Integration of emerging technologies and therapies into clinical practice;
- IP protection
- Investment.
